

## Don't Let Folds Interfere With Your Surgical Site

traxi quickly and easily retracts the panniculus for any abdominal procedure. Freeing the the staff to care for the patient.

### PREDICTABLE. RELIABLE. RETRACTION.™

Without traxi

With traxi

Retracting the panniculus provides improved access and visualization of the incision site.

Have confidence in a repeatable process

Leave traxi in place for up to 24 hours post-op

Care for patients with more compassion & dignity

## Potential Benefits For Everyone Involved

- ✓ Improve visualization
- ✓ Improve Skin to Skin
- ✓ Increase Patient Satisfaction
- ✓ Reduce OR Time
- ✓ Reduce Staff Involvement
- ✓ Reduce Staff Injury

- ✓ Eliminate Surgical Tape
- ✓ Eliminate Towel Clamps
- ✓ Eliminate the Resident Holding
- ✓ Free Hands for Operation
- ✓ No More Inhumane Methods

## Improve Patient Dignity

Whether a C-section or any other abdominal procedure, traxi is less involved than tape or straps. With reduced prep time and clinician involvement, your high BMI patients will think this is a normal part of any procedure. Application and removal are both quick and easy and will not damage your patient's skin.

“The traxi Panniculus Retractor is as perfect a solution to the pannus problem as I have ever tried. This product is a winner. . . a big-time winner.”

– James Greenberg, MD  
Chief, Division of Gynecology
